Born in September, 1980
He born September 1980 while there was a military curfew in Turkey.

Child of an Architect Father & Interior Designer Mother

First Lego 1987 New Year
He had his first LEGO as a new year gift. It was earth digger. It was his best friend for years.

Anatolian University 1999
He first attended to Civil Engineering Program at Anatolian University, Eskisehir.

First Complete Design
He was always breaking, repairing, re-inventing things but his first complete design was a computer integrated table .

Izmir University of Economics 2005
After Civil Engineering, he decided to study Industrial Design and he attended the four year Bachelor's program in Izmir University of Economics, Izmir, Turkey

Optimum Design
Two months before graduation, he started to work with Optimum Design as a exhibition stand designer. He worked there for eight months and left to start his own business with his four friends from Industrial design program.

Vardo Design
He and his four friends has started Vardo Design as an industrial design and prototyping company. They bought CNC machines to supply prototyping needs. Also they helped customers for their Research and Developments.

Married in 2012
He married in 2012 with his partner who is a Fashion designer.

Karetta Shoes
While Vardo Design was continuing, he also started work with Karetta Shoes as a side job with the design of stand, web site, and digital content for the company.

ProtoStudio
After disperse of Vardo Design, he continued works of vardo design under his own brand ProtoStudio.

PROTOSTÜDYO
PROTOTIP ATOLYESI

His son born
In 2015 his son Gece has born

Construction Business
After his son born, as a family they decided to move to his home town Bodrum to work with his father in construction business for better future for his son.

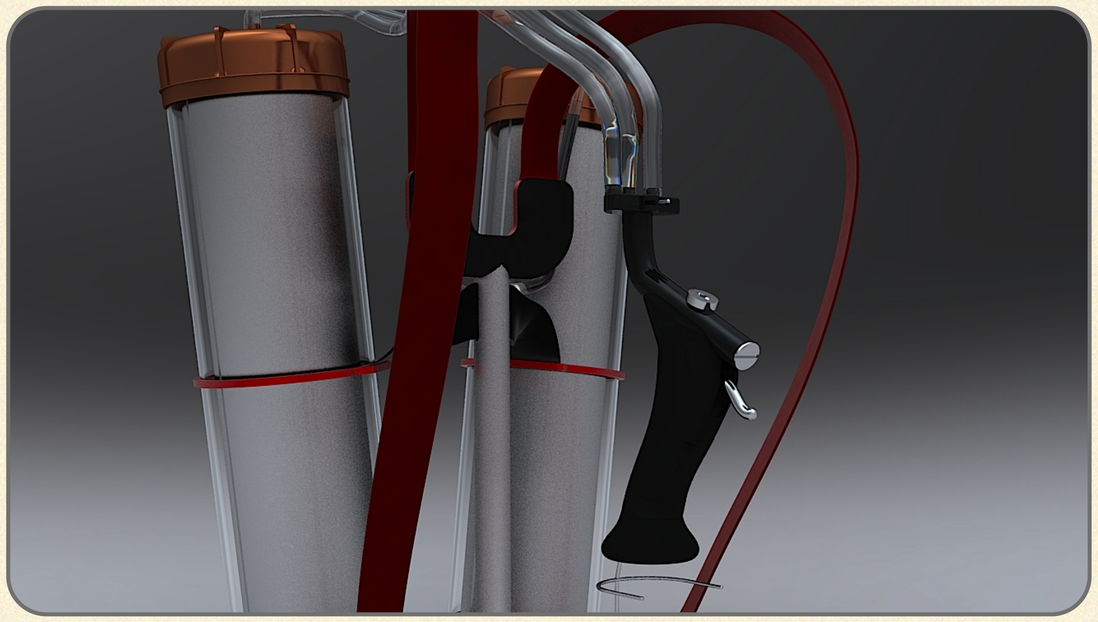
COFFEE-HUNCH

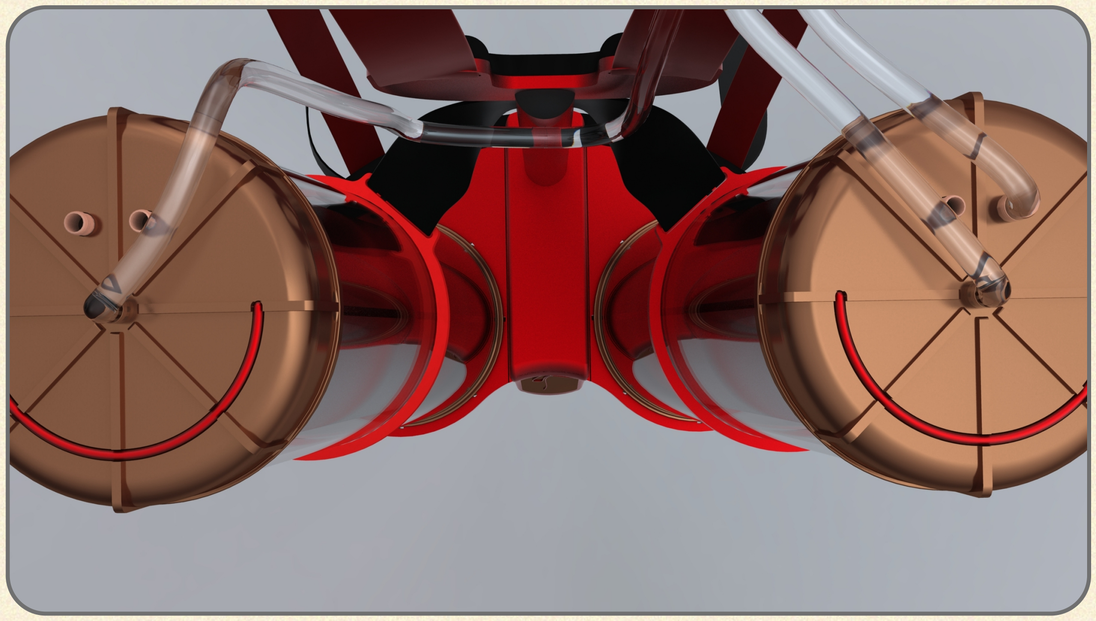


Industrial Design
Year: 2010

It was the final project for the Industrial Design Program. The design aims to solve coffee products that is brewed from pressurized hot water. It is designed for lots of variants of espresso, like cappuccino, latte, mocha and so on. It has two main capsules, one is for hot water, and the other is for the milk. Over every capsule there is a pressurized tanks that helps brew coffee and foam the milk.

Concept: Rocketeer

The designs concept was rocketeer which is a personal flying rocket that aimed to fly each soldier to the specific battle area with only a backpack size rockets. It was planned in second world war but never have been accomplished.
For this project it was giving the sense of Coffee makes raise you above the ground.



Handle that solves every mechanic

The capsules and the pressurized tank is only for stocking the materials. But the handle that solves the making of complicated coffee types while putting them in order. Also the handles design is inspired from aviation sector, its visual designed like a helicopter stick.

For More info You can download the presentation file with clicking here.
